RECAPITULATION OF MITIGATION FEATURES For 90 S Highland Ave, Units 1101-1418

1. Building Code: Unknown or does not meet the requirements of Answer A or B

Comments: The year of construction was verified as 1976 per Pinellas County

Property Appraiser.

2. Roof Covering: FBC Equivalent

Comments: We were unable to locate a roofing permit with the local building

department; however, in our professional opinion the roof covering was replaced between 2011-2012. The roof covering replacement was confirmed via historical imagery provided by Pictometry. This roof was verified as not meeting the building code requirements

outlined on the mitigation affidavit.

3. Roof Deck Attachment: Reinforced Concrete Roof Deck

Comments: Inspection verified a roof structure composed of cast-in-place or pre-

cast structural concrete designed to be self-supporting and integrally

attached to the wall / support system.

4. Roof to Wall Structural

Attachment:

Comments: Inspection verified a roof structure composed of cast-in-place or pre-

cast structural concrete designed to be self-supporting and integrally

attached to the wall / support system.

5. Roof Geometry: Flat Roof

Comments: Inspection verified flat roof shape, refer to attached photographs.

6. SWR: No

Comments: No SWR verified.

7. Opening Protection: None or Some Glazed Openings

Comments: Inspection verified some impact rated opening protection. Not all

glazed openings were protected with impact resistant coverings.

7. **Opening Protection:** What is the **weakest** form of wind borne debris protection installed on the structure? **First**, use the table to determine the weakest form of protection for each category of opening. **Second**, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings **and** (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable.

Opening Protection Level Chart Place an "X" in each row to identify all forms of protection in use for each opening type. Check only one answer below (A thru X), based on the weakest form of protection (lowest row) for any of the Glazed openings and indicate the weakest form of protection (lowest row) for Non-Glazed openings.
